    - International Classical Guitar Competition of Finland
    - Tampere Guitar Festival
    - International Guitar Contest, José Tomás Villa de Petrer
- 3) Send your video link together with the sheet music in the [program form](#).

# REQUIREMENTS & TIPS FOR VIDEO RECORDING

## 1) VIDEO

- ▶ Format: MP4
- ▶ Resolution: Full HD (1920 x 1080px)
- ▶ Landscape (horizontal)

## 2) AUDIO

- ▶ Choose the best available microphone for recording classical guitar. External microphone is strongly recommended, unless you are using a video recorder such as Zoom.
- ▶ Make sure your playing can be heard clearly and microphone is not too far away from you.
- ▶ Switch off all automatisations (compressor, automatic volume adjustment etc.)
- ▶ Set the recording volume loud enough. It is recommended to make a test recording with *ppp* and *fff* and listen. Can you hear everything or does hissing cover your playing? Does any distortion appear?

## 3) COMMON THINGS & GOOD PRACTICES

### a) Background & Lights

- ▶ Pay attention to your background. Think of the video as your business card.
- ▶ Make sure no other people will pop in to the room while you are playing.
- ▶ Try to minimise all background noise (chair, traffic, other people etc.)
- ▶ Check the lightning conditions

### b) Framing

- ▶ Make sure your head, both hands and upper body are visible.
- ▶ Please notice that your ceiling is not an interesting detail = your face should not be in the middle, a bit higher looks better.

### c) Recording procedure

- ▶ A printed competition sign (last page of this document) must be shown in the video. No speech is required.
- ▶ Each composition with one continuous take, recorded in the same place during the same session, one camera on stand, players both hands and face must be visible at all times.
- ▶ Do not make any audio or video editing (except between works), clear and good audio quality with not too much echo.
- ▶ Leave a minimum of 2 secs of silence in the beginning and end of the video (like in a live concert).

Print this and set it visible in your video.
